The Chemical Age

Index to Volume XLVI. January to June, 1942

A

Acetylene from Coal Gas, 273
Acid-Resisting Wood, 55
Acids and Alkalis, Clothing for, 23
A.C.S. Meeting, 282
Adhesives in Germany, Special, 179
Alcohol and Sugar from Wood, 223
Alkalis, Clothing for Acids and, 23
Alumina Cement, Tests on, 90
Alumina from Clay, 180
Aluminium-Magnesium Alloys, 156
America, To be Seen in, 214
American Chemists discuss Vitamins, 213
American Patents, Some New, 270
American Strategic Minerals, 52
America's Bauxite Resources, 63
Ammonia Synthesis, 304
Apparatus in 1941, New, 35
Applications of Molecular Distillation, 41, 53
Arsenic Importer-Distributors, 54
Arsenic Production in Spain, 90
Association of Scientific Workers, 260
Association of Tar Distillers, 234, 246
Atmospheric Pollution, 172
Australia's Chemical Industry, 44
Austrian Scientists, 273

AUTHORS—

Arend, A. G., Zinc Carbonate Ores, 75
Barron, Harry, Plastics in 1941, 24; Bikerman, J. J., Some Colloid-Chemical News of the Year, 26; Butcher, C. H., Selection and Maintenance of Chemical Pumps, 135
Chatterjee, P. K., Dextrines and Semi-Dextrines from Minor Starches, 189; Creevey, John, Collected Notes on Chemical Safety, 99, 155, 203, 255, 301
Datta, R. L., Dextrines and Semi-Dextrines from Minor Starches, 189
Einerl, Otto, Fluxes for Aluminium Alloys, 181, 235; Eyles, Desmond, Refractories in War Time, 125
Foxwell, G. E., The Coal Carbonisation Industries in 1941, 31
Howat, D. D., Molecular Distillation, 3; Applications of Molecular Distillation, 41, 53
Masters, David L., The Polarograph, 271, 279
Neurath, Frederic, Fluxes for Aluminium Alloys, 181, 235
Parrish, P., Conditions in, and some War Problems of, the Heavy Chemical Industry in 1941, 15; Peake, Arthur M., Solvents and Plasticisers in War Time, 21; Peck, W. C., Review of the Year's Chemical Engineering, 141; Powell R. H., Progress in Laboratory Apparatus Design under War Conditions, 211
Seymour, H., Bled Steam for Chemical Processing, 111; Evaporation of Milk, 121; Controlling Soil Reaction, 233; Stewart, C. W., Zein in Clay Coatings, 261
Thorvaldson, Thorbergur, Silicates of Calcium, 293

Auxiliary Motors and Control Gear, 51

B

B.A.C., Clothing Coupons and the, 264
Barytes in Canada, 52
Bauxite Resources, America's, 63
Bearings, Resin-Impregnated Tissues for, 272
Belfast Chemists Meet, 202
Birmingham Chemists' Meeting, 233
Bivalent Mercury, Detection of, 319
Bled Steam for Chemical Processing, 111

BOOK REVIEWS—

Annual Report of the Smithsonian Institution, 262
British Plastics Year Book, 1942, 138
Chemical Aspects of Light, The (E. J. Bowen), 138; Chemical Analysis of Ferrous Alloys and Foundry Materials (E. G. Pigott), 194; The Chemical Formulary, 194; Chemistry for Schools (C. Jenkins and E. H. Foinette), 66 "Endeavour," 66
Introduction to the Chemistry of Cellulose, An (J. T. Marsh and F. C. Wood), 262
Living Light (E. Newton Harvey), 114
Plastics in Industry ("Plastes"), 262; Projected Grand Contour Canal, The (J. F. Pownall), 262
Rubber and Its Use (Harry L. Fisher), 194
Transactions of the Institution of Chemical Engineers, 66

Brazilian Chemical Trade, 296
British Association of Chemists' Meeting, 245
British Chemical and Dyestuffs Traders' Association, 252
British Standards, New, 68
Bromine, Transport of, 118

C

Calcium Metal Production, 140
Canada, Barytes in, 52
Canada, Power in, 93
Canada's Salvage Drive, 66
Casein Aid to Drilling Muds, 170
Cell-Wool Industry, The Continental, 247
Cellulose Fodder, 242
Cement, Colouring, 281
Cement, Tests on Alumina, 90
Centrifuge for Diamond Dust, 217
Chemical Analysts Meet, 93
Chemical Containers, Wood for, 314
Chemical Engineering, Review of the Year's, 141
Chemical Engineering Group, 260
Chemical Industry, Australia's, 44
Chemical Industry in India, 33
Chemical Industry in Sweden, 302

CHEMICAL MATTERS IN PARLIAMENT—

Aluminium and Light Alloys, 234; Aneurin in Flour, 81; Anti-Fouling Paints, 222
Chemical Bleaching of Flour, 129; Chemical Control Board, 81; Copra Industry, 93
Engine Oil, Salvage of Waste, 234
Farmers, Lime for, 274; Fischer-Tropsch Process, The, 172; Flour, Aneurin in, 81; Flour, Chemical Bleaching of, 129; Fuel and Power Controller, Regional, 67; Fuel-Saving Devices, 103; Fuels, Alternative, 180
Government Chemical Officers, 43
India, Research in, 93; Industrial Health Research Board, 103
Light Alloys, Aluminium and, 234; Lime for Farmers, 274; Lubricating Oil, Refining of Used, 81; Lubricating Oil, Re-use of, 172; Manufacture of Synthetic Vitamin B, 103
Non-Ferrous Metal Control, 81
Paints, Anti-Fouling, 222; Paper Manufacture, Straw in, 103; Phosphate Deposits, Low Grade, 274; Producer Gas Units, 234; Production General Staff, A, 81
Refining of Used Lubricating Oil, 81; Research in India, 93; Rubber Reclaiming Plant, 115; Rubber, Scrap, 81

Chemical Matters in Parliament—*continued*

Salvage of Waste Engine Oil, 234; Scientific Food Committee, 180; Scrap Rubber, 81; Straw in Paper Manufacture, 103; Synthetic Vitamin B, Manufacture of, 103
Vitamins for Pharmaceutical Use, 67

Chemical Plant, Silver for, 114
Chemical Processes, Pump Design for, 145
Chemical Processing, Bled Steam for, 111
Chemical Stoneware Containers, 315
Chemicals in Italy, 280
Chemicals in South Africa, 171
Chemistry of Duplication, The, 153
Chlorite Treatment for Sugars, 103
Chromium Plating Restrictions, 68

Circular Tanks, Construction Note for, 316
Citral, New Source for, 304
Citrus Peelings, Solvents from, 295
Clay, Alumina from, 180
Clay Cleaning, Improved, 89
Clay Coatings, Zein in, 261
Clays, Resistant Films from, 89
Cleaning Machinery, Steam Plant for, 147
Cleansing of Oil Containers, The, 317
Clothing Coupons and the B.A.C., 264
Clothing for Acids and Alkalis, 23
Coal and Coke, Sampling of, 281
Coal Carbonisation Industries in 1941, The, 31
Coal Gas, Acetylene from, 273
Coke and the Chemical Industry, 112
Collected Notes on Chemical Safety, 99, 155, 203, 255, 301
Colloid-Chemical News of the Year, Some, 26
Colouring Cement, 281

COMPANY NEWS

African Explosives and Industries, 250; Amalgamated Anthracite Collieries, 84; Amalgamated Metal Corp., 308; Anchor Chemical Co., 131; Anglo-Chilean Nitrate Corp., 84; Associated Clay Industries, 250.

Babcock & Wilcox, 258; Bede Metal and Chemical Co., 250; Beechams Pills, 208; Benn Bros., 71; Benzole and By-Products, 149; Berger, Lewis & Sons, 240; Bleachers Association, The, 324; Blagden, Victor & Co., 96; Blythe, William & Co., 198, 208; Boake Roberts & Co., A., 84, 208; Boots Pure Drug Co., 96, 308; Borax Consolidated, 149; Bradford Dyers Association, 298; Briggs, William & Sons, 11, 198; British Alkaloids, 298, 308; British Aluminium Co., 186; British Benzol and Coal Distillation, 240; British Drug Houses, 208, 258; British Emulsifiers, 308; British Industrial Plastics, 71, 107; British Lead Mills, 240; British Match Corporation, 240; British Oil & Cake Mills, 288; British Oxygen Co., 186, 227, 288; British Silk Dyeing Co., 240; British Tar Products, 208; British Thermostat Co., 276; British Xylonite, 186; Brotherhood, Peter, 117; Bryant & May, 208; Burmah Oil Co., 198; Bush, W. J. & Co., 198

Canadian Industrial Alcohol Co., 298; Caribonum, 84; Caribonum Trust, 84; Central Provinces Manganese Ore Co., 258; Cerebos, 298; Chemical Service Co., 267; Cooper, McDougall & Robertson, 186, 258

Derbyshire Stone, 308; Devonshire Baryta Co., 96; Dorman Long & Co., 117; Doulton & Co., 107, 186; Dussek Bros., 38

Company News—*continued*

Eaglescliffe Chemical Co., 186, 288; Eastern Chemical Co., 186; Eastwoods Cement, 324; Eastwoods Lewes Cement, 324; Egyptian Salt & Soda Co., 11, 131; Electrolytic Chemical Products, 198; Electrolytic Zinc Company of Australasia, 47; English China Clays, 60, 96; English Clays Lovering Pochin & Co., 47; Eucryl, 250; Evans, Sons, Lescher & Webb, 324

Fison, Packard & Prentice, 84

Gas Light & Coke Co., 227; General Refractories, 208; Goodlass Wall & Lead Industries, 298; Griffiths Hughes Proprietaries, 276

Hadfields, 186; Hampshire, F. W., & Co., 198; High Duty Paints, 258

Imperial Chemical Industries, 208; Imperial Smelting Corporation, 186; Indestructible Paint Co., 198, 227; International Paint & Compositions, 117

Kern Oil Co., 131

Lacrinoid Products, 198; Laporte, B., 267; Lautaro Nitrate Company, 324; Lever Bros. & Unilever, 324; Lightalloys, 131; London & Thames Haven Oil Wharves, 198; Lovering China Clays, 324

Macleans, 324; Manganese Bronze and Brass Co., 198; Metal Industries, 298; Midland Bank, 47; Millom and Askam Hematite Iron Co., 227; Milton Antiseptic, 298; Milton Proprietary, 96, 149, 276; Minerals Separation, 96; Minimax, 324; Monsanto Chemicals, 186; Morgan Crucible Co., 324; Murex, 208.

Nairn & Greenwich, Michael, 47; Neill, Wm., & Son (St. Helens), 38, 71; Northern Counties Laboratory, 60.

Oakey, John, & Sons, 131

Pinchin, Johnson & Co., 198; Pullin, R. B., & Co., 96

Reckitt & Sons, 107; Redferns' Rubber Works, 71, 96; Rio Tinto Co., 258; Ruberoid Co., 162

Sangers, 47; Scottish Agricultural Industries, 149; Standard Chemical Co., 107; Sternol, 208; Stewarts & Lloyds, 198, 258; Stewarts & Lloyds of South Africa, 276; Super Oil Seals & Gaskets, 84, 107; Svenska Metallverken, 117

Thompson Bros. (Bilston), 71, 186; Thorncliffe Coal Distillation, 84; Tunnel Asbestos Cement, 324; Turner & Newall, 308

United Glass Bottle Manufacturers, 186; United Molasses, 240; Universal Asbestos Manufacturing Co., 71

Villa Laboratories, 39; Viscose Development Co., 131, 186

Watford Chemical Co., 288; Wembley Anodising, 117

Xyline, 198

Yorkshire Indigo, Scarlet and Colour Dyers, 162

Compressed Air Plant and Air Liquefaction, 301
Construction Note for Circular Tanks, 316
Containers, Chemical Stoneware, 315
Containers for War-Time Transport, 311
Containers for Chemicals, Welded, 313.
Control Gear, Auxiliary Motors and, 51

R v. 46 Jan.-June 1942

CONTROL ORDERS, NEW—

Acetates, Export of, 144; Aluminium Alloy Scrap, 306; Antimony, 55; Asbestos Scrap, Export of, 129
Barium Minerals, Felspar, Talc, etc., 54; Bromides and Bromates, 172; Buchu Leaves, Licences to Import, 222
Cadmium, 34; Chlorinated Rubber Export, 92; China Clay, 158; Chrome, Magnesite and Wolfram, 318; Chromium Compounds, 195; Citric Acid, 274; Coal-Tar Bases and Road Tar, 256; Coal-Tar Products, 102, 233; Cobalt Ores and Salts, 274; Congo Copal, 158.
Derris Root, 55; Drying Oils, 172
Essential Oils and Turpentine, 46; Essential Works, 144; Export Licensing, 67, 92, 248; Export of Goods (Control) Orders, 10, 130, 144, 306.
Felspar, 55; Ferro-Alloy Prices, 158; Fertilisers, 148, 306; Fertilisers, Sale of, 195; Fertiliser Prices, 205; Food Substitutes (Control), 161
Gloves, Rubber, 264
Heavy Chemicals, 222; Hydroquinone K.I.D. Exemption Suspended, 6
Industrial Alcohol, 233; Invert Sugar, Prices of, 233; Iodine, Export of, 144; Iron and Steel, 318; Iron and Steel, Export of, 144; Iron and Steel Prices, 205
Key Industry Duty, 6, 144
Latex Prices, 158; Lead and Chromium Compounds, etc., 195; Licensing Area Extended, 248; Lime, Methylene Chloride, Citric Acid, 274
Machinery, Plant and Appliances, 34; Magnesite, *see* Chrome, Magnesite and Wolfram; Mercury, 92; Methylene Chloride, 274; Molasses and Industrial Alcohol, 81; Molasses Prices, 158; Molybdenum and Tungsten, 34
Nickel and its Alloys, 34
Oils, Drying, 172
Paint, Lacquer and Varnish, 6, 92; Potassium Salts, 102; Purchase Tax Changes, 274
Rubber, Control of, 10,116; Rubber Export of, 144; Rubber Gloves, 264; Rubber, Reclaimed and Synthetic, 92; Rubber, Synthetic, 295
Saccharin, Control and Prices, 36, 297; Scrap Metal, 267; Shellac Licences, Revocation of, 67; Soapmaking Licences, 92; Soya Flour, 256; Starch and Dextrine, 249; Starch made from Wheat, 248.
Talc, 55; Tin Control and Prices, 102; Tins, Cans, Kegs, etc., 55, 172, 239, 281; Tungsten, 34; Tungsten Alloys, 102; Turpentine, 46
Wheat Gluten Manufacture, 129; Wheat, Starch made from, 248; Wolfram, *see* Chrome, Magnesite and Wolfram
Zinc Sheets, 205
Convertible Pumps, 242
Conveyor, A Handy Portable, 314

CORRESPONDENCE—

Acid-Resisting Wood (W. T. Colyer), 91
Concentration of Rubber Manufacture (L. V. Kenward), 192
Economy in Steel (A. E. Shorter), 129; Evaporation of Milk (Brian M. Reavell), 169; Extinguishing Magnesium Fires (G. Harold Durston), 147
Fire Caused by Steam-Heated Pipes (Bruno Schweig), 169; Fire Risk from Silver Compounds (E. Downs) 192
Methane as a Raw Material (Erwin M. Bier), 91; Milk, Evaporation of (Brian M. Reavell), 169
Oil and the Chemical Industry (F. Kind), 122
Recovery of Used Lubricating Oil (J. Harwood, W. Cule Davies), 74; Recovery of Used Lubricating Oil (L. Soulal), 2; Rubber Manufacture, Concentration of (L. V. Kenward), 192; Reference to Synthetic Rubbers (Sidney Rogerson), 302
Separation Process Required (M. Riddihough), 179; Silver Compounds, Fire Risk from (E. Downs), 192; Spontaneous Combustion of Wood (Ernest A. Rudge), 179; Steam-Heated Pipes, Fire Caused by (Bruno Schweig), 169
Wood, Spontaneous Combustion of (Ernest A. Rudge), 179

D

Detection of Bivalent Mercury, 319
Dextrines and Semi-Dextrines from Minor Starches, 189, 201
Diamond Dust, Centrifuge for, 217
Diazo Salts, Preparation of, 244
Distillation, Molecular, 3
Drilling Muds, Casein Aid to, 170
Duplication, The Chemistry of, 153
Dyestuffs Advisory Committee, 118

E

Electrodepositors and the War, 52
Electrolytic Determination of Iron, 207
Electrolytic Sodium Chlorate, 305
Eletroplating, Hydrogen Ion Control in, 193
Electrostatic Precipitation, 165
Evaporation of Milk, 121
Explosion, Mustard Oil, 43
Extinguishing Magnesium Fires, 114

EDITORIAL

Accident and Research, 210; Activated Carbon, 310; Agar-Agar, 120; A.R.P., E.P.T. and, 260; Alloys, Group Classification of, 230; American Synthetic Rubber, 242; American T.N.T. Production, 40; Army, A Word for the, 152; Asbestos Problems, 278
